

MYSTERIOUS MOTHS

- Did you know that many moths use camouflage to blend into their environment? Look around your house and decorate your moth papers to blend into a household surface.
- Tape it to that surface so it blends in.
- Invite a parent or sibling into that room and time how long it takes for them to find the camouflaged moth.

**CAMOUFLAGED
CREATIONS**

- Draw a picture of a bizarre alien landscape. What does it look like? What kind of habitat is it?
- Create a creature that is perfectly camouflaged to this strange environment. Draw it or create it with recycled objects, or found objects in nature!

OBSCURED OBJECTS

- Hide your bag's items in your yard in a habitat where they are camouflaged, recording and remembering where you hid the items. Don't forget to pick them up afterward!
- Have someone else search for the items.
- Record how many of each item were found.
- What does this teach us about camouflage?
